

The fast LT projectors

LT25, LT30, LT35

Small, light, fast – and with so many high-tech features.

- ▶ Unique in their class: auto focus ensures a perfect image in only 1 sec.
- ▶ Automatic vertical Keystone Correction
- ▶ Automatic input signal recognition
- ▶ Preset wall colour correction
- ▶ Brilliant! Up to 3,000 ANSI Lumens
- ▶ Power contrast: 1,500:1/1,600:1
- ▶ Weighs in at only 2 kg

Empowered by Innovation

NEC

Unbelievable speed.

LT25, LT30 and LT35 – smaller, faster, more automation:

But even lighter and more intelligent... Is this your idea of the ideal projector? Your wish is NEC's new LT projectors' command! Not only are these three innovations convenient and portable, they are also enormously flexible and respond to your needs completely automatically. It's never been easier to adjust a projector.

More useful, automatically controlled high-tech features. More comfort and less effort. And all at a conspicuously lower price. NEC's new LTs completely redefine the concept of value for money. There's hardly any alternative: purchase an LT25, LT30 or LT35 and watch your business profit!

The new DLP™ LT projectors – the LT25, LT30 and LT35 – give you three opportunities to select a top-quality device with excellent functionality. All three are top performers in terms of brilliance and contrast, and their low weight makes them easy to transport. And because they react to numerous setting changes in the twinkling of an eye, the new LTs are perfect for your individual requirements.

▶ The perfect image in only 1 second.

The auto focus function requires only an instant to optimise the image after it is projected.

Your new LT's reaction time is just as fast and dynamic when you change its position and throwing distance within a range of 1.4 and 5.5 meters. Just turn it on! The auto focus is activated immediately, and you see crystal-clear images in only 1 second – with no testing or other adjustments.

▶ Automatic vertical Keystone Correction.

Even when you need to change projection angles, resulting in changes in image geometry, our three LTs are especially quick. We preset this function at time of manufacture. This makes sure your LT recognises the projection angle right out of the box so that it makes all necessary adjustments and enables ideally balanced, right-angled projection.

▶ Auto start with immediate input signal recognition.

The quick-start function makes your LT ready to go virtually immediately. Whether your pictures come from a DVD player, PC or any other input: your projector adapts in almost no time. Thanks to auto start, the LT25, LT30 and LT35 are all capable of instantaneous input signal identification. You don't have to press any buttons or make any settings yourself.

▶ Even wall colour correction is conveniently preset.

The LT25, LT30 and LT35 are not only happy adapting your images to walls of different colours, e.g. if you first project onto a white surface, then a green one.

Our projectors make it simple for you to activate and select this function as well. You need only select the colour of the projection surface by pressing a button on the menu, and presto, the LT automatically adjusts the image colours to the background.

▶ Save time with the fast Power-Off function.

When you're done, the LT25, 30 and 35 have additional new highlights: they shut down very fast thanks to the Quick-Power-Off function – even faster than your PC! In addition, you

can also use the convenient Off-Timer function that automatically turns your LT off at the desired time.

▶ Here... there... everywhere: you'll love the LTs' extremely mobile projection capabilities.

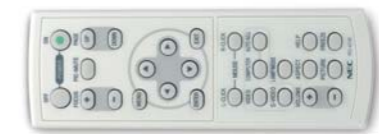

You've certainly realized by now that due to their low weight and great new features, the new LTs are especially apt for mobile and flexible projection. Go ahead: move from one room to another! The LTs move right with you and love nothing better than adapting to new presentation environments in a split second. And of course, you're the winner – because you profit not only from their efficiency and unlimited capabilities, but also because of the time you save.

▶ High light intensity and contrast as well as enormous resolution – and light as a feather.

NEC's three light, super-fast specialists give you an unrivalled weight-to-brightness ratio. The LT35 only weighs 2 kg and projects with up to 3,000 ANSI Lumens, making it the front-runner in its weight

Everything under control from anywhere in the room at the touch of an LT remote control button.

category. The LT25 and LT30 are just as light and project with 2,200 and 2,600 ANSI Lumens respectively. All three use the advanced DLP™ display technology and gleam with an optimal resolution of 1,024 x 768 (XGA). And this with razor-sharp contrast: The LT30 and LT35 achieve a contrast of 1,600:1; the LT25 achieves 1,500:1.

▶ Highly versatile due to an impressive array of high-tech functions.

As soon as one of the three LTs starts making presentations at your company, you will profit from an abundance of helpful functions.

The new projectors have PC Control and can be directly controlled via RS-232C.

They also all have Eco Mode, which you can turn on to save energy and increase lamp life.

And if you run an international business, your LT will enjoy working anywhere thanks to the easily operable OSD in 20 languages.

Finally, we'd like to say something about security. Your LT gives you the best cards because it has an electronic keyboard lock and password-protected menu. An apparatus for a Kensington lock ensures your projector's physical protection as well.

▶ Always available due to service and warranty.

You're planning on the faithful company of your LT at meetings with customers? It's going to be a major player in your company's IT department? Whatever you need it for – it will always be ready to go. Our service package with 3-year warranty and customer-friendly service is responsible.

The first impression? New and chic: the round, flowing LT form.

Anybody with a major role in a presentation has earned safe transport: the LT soft case ensures this.

Useful high-tech functions, in view and at your fingertips: the control panel couldn't be more clearly arranged.

Outstanding technology automatically included.

Technical Specifications

	LT25	LT30	LT35
Display	1 x 1.78 cm (0.69") DMD \pm /12° Chip (DDR)-DLP™ Technology		
Native Resolution	1,024 x 768 (XGA)		
Lens	F= 2.4–2.6, f= 25.7–30.8 mm		
Lamp	200 W AC (170 W Eco Mode)	200 W AC (170 W Eco Mode)	220 W AC (170 W Eco Mode)
Image Diagonal	0.762–7.62 m (30–300")		
Projection factor	1.8–2.16:1		
Brightness	2,200 ANSI Lumens	2,600 ANSI Lumens	3,000 ANSI Lumens
- Eco Mode	1,900 ANSI Lumens	2,200 ANSI Lumens	2,300 ANSI Lumens
Contrast Ratio	1,500:1	1,600:1	1,600:1
Frequency			
- Horizontal	15–100 kHz (RGB: 24 kHz–100 kHz)		
- Vertical	50–85 Hz		
Speakers	1 x 1 W mono		
Video Signals	PAL/PAL60/NTSC/SECAM/NTSC 4.43/PAL-N/PAL-M		
Component Signals	Yes, high definition compatible		
RGB	Yes		
Connections			
Computer Input	Mini D-SUB, 15-pin		
Video Input	Phono jack		
S-Video Input	DIN 4-pin (Hoseiden Connection)		
Audio Input	1 stereo mini jack		
PC Control (RS-232)	Mini DIN, 8-pin		
Power Supply	100–120/200–240V AC/50–60 Hz		
Power Consumption	260 W max./Stand-by mode 8 W	260 W max./Stand-by mode 8 W	280 W max./Stand-by mode 8 W
Fan Noise	33 dB (Eco Mode)		
Dimensions (W x H x D)	260 x 89 x 208.5 mm (without lens and feet)		
Weight	2.0 kg		
Optional Accessories	Replacement lamp, YUV cable (ADP-CV1 adapter), SCART-RGB adapter, ceiling mount		
Technological Innovation			
	Automatic focus, automatic digital Keystone Correction (\pm 16°), OSD in 20 languages, Quick-Power-Off function, Off-Timer function, wall colour correction, Eco Mode, Plug&Play		

Small, light, fast, fully automatic... and extremely convenient, flexible and agile. The three new LTs will brighten your day!

Your dealer will be happy to show you these three new winners. Contact him for advice on your specific situation.
